

JAIVEER BALA

San Jose, CA | +1 (669)-245-0468 | jaiveerbala@gmail.com

EDUCATION & CERTIFICATIONS

Leland High School

Expected Graduation: May 2029

San Jose, CA

GPA: 4.0 UW, 4.33 W

Certified SolidWorks Associate (CSWA)

Dassault Systèmes – industry-recognized 3D CAD modeling and design certification

WORK EXPERIENCE

Event Chair & Commissioner

Associated Student Body – Leland High School

August 2025 – Present

San Jose, CA

- Planned a multicultural campus event to build appreciation across a diverse student community
- Onboarded new students into campus life through a structured orientation program
- Contributed to 6 school-wide events, including Homecoming (900 attendees) and \$10,000+ in fundraisers

EXTRACURRICULARS & CLUBS

Aerospace and Engineering Club

Member

August 2025 – Present

- Competed against 50 teams in the MIT BACC CubeSat challenge, developing lunar imaging software applicable to the NASA Artemis missions
- Collaborate with fellow students on hands-on technical projects spanning robotics, aerospace, and mechanical design
- Engage in peer-led workshops and design challenges to develop real-world engineering skills

FIRST Tech Challenge – Team 8404

Mechanical Lead

May 2023 – Present

- Lead a 6-person mechanical subteam in designing and manufacturing the full competition robot each season
- Won 10 awards across regionals and championships, including Inspire, Design, Control, and Winning Alliance
- Set 2 world records and ranked in the FTC Hall of Fame Top 40 among thousands of global competitors

PROJECTS

2-Speed Transmission

2025

- Designed and built a mechanical 2-speed transmission that can switch between a 1:1 and 5:3 output ratio in under a second

Differential Swerve Robotics Drivetrain

2024

- Designed, manufactured, and constructed a custom high-speed robotics drivetrain utilizing 2 independent wheel speed differentials for simultaneous control over wheel rotation and steering

Ultrasonic Levitator

2024

- Designed and prototyped an ultrasonic levitation device using opposing ultrasonic transducers to suspend lightweight objects in midair

RFID Door Lock

2024

- Designed and implemented a smart deadbolt system using an Arduino Nano and an RFID module to authenticate NFC/RFID tags and actuate a servo-controlled locking mechanism similar to hotel keycard entry systems

VOLUNTEERING & COMMUNITY SERVICE

Boys Team Charity – Almaden Chapter

Volunteer (100+ hours)

April 2023 – Present

- Sorted and distributed food to those in need at Second Harvest of Silicon Valley
- Organized and ran sports competitions for individuals with special needs at the Special Olympics Summer Games
- Maintained the Heritage Rose Garden in downtown San Jose for the local community

Skills

Tools: SolidWorks CAD, Onshape, CapCut, Canva, IntelliJ, Google Workspace

Languages: Python, Java
